Subject Index

Adsorption
Carbon dioxide hydrogenation on rhodium supported on transition metal oxides: Effect of reduction temperature on product distribution 129

Alcohol synthesis
Properties of silica-supported Cu/Co bimetallic catalysts in the synthesis of higher alcohols 281

Alkane dehydrocyclization
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117

Alloy formation
Properties of silica-supported Cu/Co bimetallic catalysts in the synthesis of higher alcohols 281

Amination of 1-methoxy-2-propanol
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293

Aromatization
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143

Aromatization
Conversion of n-butane into BTX aromatics on new hybrid catalysts 175

Barium
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159

Bastnaesite
Thermogravimetric study of bastnaesite under simulated SO_x transfer conditions 21

Benzene hydrogenation
Activation of silica-supported nickel catalyst through surface modification of the support 31

Calcination
Activation of silica-supported nickel catalyst through surface modification of the support 31

Calcium
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1

Carbon dioxide hydrogenation
Carbon dioxide hydrogenation on rhodium supported on transition metal oxides: Effect of reduction temperature on product distribution 129

Carbon monoxide oxidation
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225

Carbon monoxide oxidation
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253

Catalyst characterization (AAS, BET, zeta potential)
Preparation and characterization by electrophoretic migration of TiO_2–Al_2O_3 catalytic supports 45

Catalyst characterization (BET, XPS)
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Catalyst characterization (BET)
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11

Catalyst characterization (HR-AEM, TPR)
Properties of silica-supported Cu/Co bimetallic catalysts in the synthesis of higher alcohols 281

Catalyst characterization (Mössbauer spectroscopy)
Sulfidation of alumina-supported iron and iron–molybdenum oxide catalysts 69

Catalyst characterization (MAT)
Effect of feedstock variability on catalytic cracking yields 189

Catalyst characterization (NMR)
Characterization of montmorillonites pillared by cationic silicon species using ^{129}Xe-NMR spectroscopy L1

Catalyst characterization (thermogravimetry)
Thermogravimetric study of bastnaesite under simulated SO_x transfer conditions 21

Catalyst characterization (TPR)

Selective catalytic reduction of nitric oxide over amorphous and crystalline chromia. I. Comparative study of activities 211
Catalyst characterization (TPR)
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225
Catalyst characterization (XPS)
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159
Catalyst deactivation
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293
Catalyst preparation (co-impregnation)
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53
Catalyst preparation (impregnation)
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11
Catalyst preparation (support)
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225
Catalyst preparation (vapour deposition, wet impregnation)
Preparation and characterization by electrophoretic migration of TiO_2–Al_2O_3 catalytic supports 45
Catalyst preparation (wet impregnation)
Activation of silica-supported nickel catalyst through surface modification of the support 31
Chromium oxide
Selective catalytic reduction of nitric oxide over amorphous and crystalline chromia. I. Comparative study of activities 211
Cobalt
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53
Coke formation
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117
Copper
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159
Copper oxide
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253
Copper oxide
Solid electrolyte potentiometry aided study of the oxidation of propene and copper oxides: Phase-composition and selectivity 241
Copper/silica
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225
Copper–chromite
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253
Copper–cobalt/silica
Properties of silica-supported Cu/Co bimetallic catalysts in the synthesis of higher alcohols 281
Cracking catalysts
Effect of feedstock variability on catalytic cracking yields 189

Deactivation
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253
Decomposition
Enhancement effect of Mg^{2+} ion on direct nitric oxide decomposition over supported palladium catalysts L11
Dehydrocyclization
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11
Dehydrogenation
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117
Dispersion

Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Dispersion
Activation of silica-supported nickel catalyst through surface modification of the support 31

Electrophoretic migration
Preparation and characterization by electrophoretic migration of TiO_2–Al_2O_3 catalytic supports 45

Feed characterization
Effect of feedstock variability on catalytic cracking yields 189

Fischer–Tropsch synthesis
Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85

Fluid catalytic cracking
Thermogravimetric study of bastnaesite under simulated SO_x transfer conditions 21

Gallium/ZSM-5
Conversion of n-butane into BTX aromatics on new hybrid catalysts 175

Glassy alloys
Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85

Hydrodesulphurization
Sulfidation of alumina-supported iron and iron–molybdenum oxide catalysts 69

Hydrogen back spillover
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143

Hydrogen peroxide
Influence of hydrogen peroxide on the kinetics of phenol photodegradation in aqueous titanium dioxide dispersion 101

Hydrogen spillover
Conversion of n-butane into BTX aromatics on new hybrid catalysts 175

Hydrogenation
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117

Hydrogenolysis
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117

Iron
Sulfidation of alumina-supported iron and iron–molybdenum oxide catalysts 69

Iron
Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85

Iron–molybdenum
Sulfidation of alumina-supported iron and iron–molybdenum oxide catalysts 69

Isoelectric point
Preparation and characterization by electrophoretic migration of TiO_2–Al_2O_3 catalytic supports 45

Isomerization
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11

Kinetics
Influence of hydrogen peroxide on the kinetics of phenol photodegradation in aqueous titanium dioxide dispersion 101

Kinetics
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293

Lanthanum
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1

Light alkanes
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143

Lithium chloride
Investigation of the partial oxidation of hydrocarbons on methane coupling catalysts 259

Magnesium

Enhancement effect of Mg^{2+} ion on direct nitric oxide decomposition over supported palladium catalysts L11

Manganese dioxode
Pyridinealdehydes preparation by vapour-phase oxidation of 2- and 3-pyridinemethanols and of their N-oxides on a V–Mo oxide catalyst L5

Manganese oxide
Investigation of the partial oxidation of hydrocarbons on methane coupling catalysts 259

Methane coupling
Investigation of the partial oxidation of hydrocarbons on methane coupling catalysts 259

Methanol synthesis
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1

Molybdenum–alumina
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Montmorillonites
Characterization of montmorillonites pillared by cationic silicon species using ^{129}Xe-NMR spectroscopy L1

Nickel
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus%enickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Nickel
Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85

Nickel/silica
Activation of silica-supported nickel catalyst through surface modification of the support 31

Nickel–silica
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293

Nitric oxide
Enhancement effect of Mg^{2+} ion on direct nitric oxide decomposition over supported palladium catalysts L11

Nitric oxide reduction
Selective catalytic reduction of nitric oxide over amorphous and crystalline chromia. I. Comparative study of activities 211

Oxidation catalysts
Pyridinealdehydes preparation by vapour-phase oxidation of 2- and 3-pyridinemethanols and of their N-oxides on a V–Mo oxide catalyst L5

Palladium
Enhancement effect of Mg^{2+} ion on direct nitric oxide decomposition over supported palladium catalysts L11

Palladium/silica
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1

Phenol photodegradation
Influence of hydrogen peroxide on the kinetics of phenol photodegradation in aqueous titanium dioxide dispersion 101

Phosphorus
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus–nickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Photocatalysis
Influence of hydrogen peroxide on the kinetics of phenol photodegradation in aqueous titanium dioxide dispersion 101

Platinum
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117

Platinum/alumina
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11

Platinum–chromium/alumina
Effect of the nature of promoting chromium-containing compounds on the isomerization and dehydrocyclization activities of Pt–Cr/Al_2O_3 catalysts 11

Pore size
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225

Potassium
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1
Promoter effect
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1
Propane hydrogenolysis
Properties of silica-supported Cu/Co bimetallic catalysts in the synthesis of higher alcohols 281
Propene oxidation
Solid electrolyte potentiometry aided study of the oxidation of propene and copper oxides: Phase-composition and selectivity 241
Pyridine carbinol oxidation
Pyridinealdehydes preparation by vapour-phase oxidation of 2- and 3-pyridinemethanols and of their N-oxides on a V–Mo oxide catalyst L5

Reaction pathway
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293
Rhenium
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117
Rhodium/niobia
Carbon dioxide hydrogenation on rhodium supported on transition metal oxides: Effect of reduction temperature on product distribution 129
Rhodium/titania
Carbon dioxide hydrogenation on rhodium supported on transition metal oxides: Effect of reduction temperature on product distribution 129

Selective oxidation
Investigation of the partial oxidation of hydrocarbons on methane coupling catalysts 259
selectivity (2-amino-1-methoxypropane)
Catalytic amination of 1-methoxy-2-propanol over silica supported nickel: Study of the influence of the reaction parameters 293
Selectivity (acrolein)
Solid electrolyte potentiometry aided study of the oxidation of propene and copper oxides: Phase-composition and selectivity 241
Selectivity (benzene, toluene)
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117
Selectivity (benzonitrile)
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159
Selectivity (C_1–C_3 hydrocarbons, methanol)
Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85
Selectivity (C_{5+} gasoline)
Effect of feedstock variability on catalytic cracking yields 189
Selectivity (methanol)
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1
Selectivity (nitrogen vs. nitrous oxide)
Selective catalytic reduction of nitric oxide over amorphous and crystalline chromia. I. Comparative study of activities 211
Silica spheres
Preparation and characterization of porous silica spheres containing a copper (oxide) catalyst 225
Sintering
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253
Solid electrolyte potentiometry
Solid electrolyte potentiometry aided study of the oxidation of propene and copper oxides: Phase-composition and selectivity 241
Spillover
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143
Sulphidation
Sulfidation of alumina-supported iron and iron–molybdenum oxide catalysts 69
Sulphur oxides
Thermogravimetric study of bastnaesite under simulated SO_x transfer conditions 21
Sulphur poisoning
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117
Syngas conversion

Catalytic behaviour of some glassy alloys to the Fischer-Tropsch reaction at high pressures 85

Syngas conversion
Effects of promoters of palladium/silica catalysts for the synthesis of methanol 1

Thiophene hydrodesulphurization
Effect of calcination and water extraction on the distribution of the active components in the oxide form of phosphorus‰nickel–molybdenum/alumina catalyst for hydrodesulfurization 53

Titania–alumina
Preparation and characterization by electrophoretic migration of TiO_2–Al_2O_3 catalytic supports 45

Titanium dioxide
Influence of hydrogen peroxide on the kinetics of phenol photodegradation in aqueous titanium dioxide dispersion 101

Toluene ammoxidation
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159

Toluene demethylation
Possible advantages due to sulfidation of reforming catalysts working under conditions of strong self-poisoning 117

Vanadium–molybdenum/alumina
Pyridinealdehydes preparation by vapour-phase oxidation of 2- and 3-pyridinemethanols and of their N-oxides on a V–Mo oxide catalyst L5

Water addition
Changes in alumina supported copper–chromite catalysts by the introduction of water during carbon monoxide oxidation 253

Xenon-NMR
Characterization of montmorillonites pillared by cationic silicon species using ^{129}Xe-NMR spectroscopy L1

Yttrium
Ammoxidation of toluene by $YBa_2Cu_3O_{6+x}$ and copper oxides: Activity and XPS studies 159

Zeolites
Characterization of montmorillonites pillared by cationic silicon species using ^{129}Xe-NMR spectroscopy L1

Zeolites
Conversion of n-butane into BTX aromatics on new hybrid catalysts 175

Zeolites
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143

Zinc oxide hybrids
Long distance hydrogen back-spillover (LD-HBS) phenomena in the aromatization of light alkanes 143

Zinc,ZSM-5
Conversion of n-butane into BTX aromatics on new hybrid catalysts 175
